

Cement Finisher/Construction Craftworker RED SEAL TRADE

Level 1 pre-apprenticeship Trades Program blended into 10 weeks.

Concrete Finishers place and finish concrete in a variety of colors, textures and finishes. They work on a variety of structures, including industrial and institutional buildings (e.g. hospitals, manufacturing, warehouses, shopping malls), bridges, roads, tunnels and dams, and perform work on surfaces ranging from floors, walls and stairs, to driveways, sidewalks and curbs. Construction Craftworker are skilled trades people who perform a wide range of construction-related activities. They use a variety of hand and power tools, forklifts, skid steers, mini excavators, elevated work platforms and more using technical skills in various stages of construction be it interior or exterior work, formwork, demolition and more.

Our training program follows the standards set out by Skilled Trades Ontario, and is designed to provide apprentices with a wide range of skills, including:

Here are some of the certifications and hands on training you will receive:

- Construction Health & Safety Training
- Site Preparation, Concrete Technology and Placement, Finishing and Curing
- Skid steer, Elevated Work Platform, Rough Terrain Forklift, Miniexcavator
- Hoisting and Rigging
- Safe Hand Tools, Power Tools and Powered Equipment Operation

AND MUCH MORE

Demand for trained, highly skilled workers is priority for employers and we can give you these skills.
