

Commercial Fishing - Deckhand

2 Week Program

Program Info

In the Commercial Fishing - Deckhand program, the participants will develop the basic skills and knowledge necessary to prepare for immediate employment onboard commercial vessels. The participants will also be introduced to the notion of value-added products and niche marketing as it relates to fish products.

Program Delivery

The program is divided into four modules:

- Module one: Background
- Module two: Safety
- Module three: Operations
- Module four: Hands on Training (on the water)

The participants will be evaluated at the completion of each module on their ability to demonstrate their knowledge by performing the job competencies. The participants will receive a college certificate upon the successful completion of the program.
