

## Forest Inventory Management

### 4 Week Program

#### Program Info

The goal of the Forestry Inventory Management program is to give graduates the skills to identify wood supply to consistent quality and cost, determine inventory forecasting to meet their supplier demands and to establish efficiencies in forest operations. This program is designed for graduates to work as management staff in sawmill and/or forest operations.

#### Course Topics

- Forest Inventory Verification: quantity and quality.
- Mill Inventory Management: round wood and sawn product.
- Wood Measurements: introduction to scaling only, no licence.
- Lumber Grading: introduction only, no certificate.
- Wood Purchasing: sourcing, budgeting, pricing, contract negotiation.
